DATE: 2 March 1953

A/B, IX, 1, 14

TO: FILE

FROM: [redacted] -A

SUBJECT: Liaison Conference [redacted] -D

1. On 2 March 1953, [redacted] and the writer (Labor A
visited by [redacted] Liaison [redacted] A, B, C
[redacted], in connection with the [redacted] case. The reason for this visit was that the [redacted] people intend B
possibly to use [redacted] in an operation in [redacted] and wish to find out D, F
whether or not [redacted]

1. He had too much knowledge from a medical point of view (anemia, dengue, tachycardia, drugs, etc.) from our previous AMBIDEX work and

2. From a security point of view, could be given too much information to the [redacted] he would not H
directly to them.

2. [redacted] expressed the professional opinion [redacted] C
the AMBIDEX work in June 1952 was convinced that [redacted] would not D
have any valuable knowledge of the AMBIDEX techniques. He stated that
in his opinion [redacted] believed he was given a medical treatment and D
that questions asked of him were of a medical nature and not pure inter-
rogation.

3. [redacted] further stated that he felt that in consider- C
able part [redacted] would have total amnesia for such that went on during D
[redacted] when AMBIDEX treatment was applied. He also stated he would have
no knowledge of the chemicals, techniques, personalities, etc. that would
be of value to the [redacted] he could not. In connection with the H, C
trip in August 19[redacted] stated he believed [redacted] would E, D
know that he had been subjected to drugs since his behavior was not nor-
mal and [redacted] himself in an intelligent, shrewd, hard-core agent D
type. [redacted] stated it would not take any difference any way since C
[redacted] was not asked pertinent or intelligence-type questions and D
certainly would have no knowledge of chemicals given since they were put
in coffee, beer, salt in his food.

4. [redacted] stated he felt, from a medical point of view, C
there would be no real harm in using [redacted] for another operation and D
that if [redacted] sold out to the [redacted] he could give them no truly D, H
valuable information and if he did give them information, the information
would do [redacted] more than establish that [redacted] could give no D
factual details.

[redacted]

5. In connection with the [redacted] to be obtained by [redacted] from [redacted] for investigation, [redacted] expressed his opinion that [redacted] knowledge the fact that he was given chordals during the [redacted] process but that he would have very little other information and he felt that [redacted] statements were simply designed to serve his own ends and were based on an intelligent guess and not much more. D, F, A

6. [redacted] stated that it would be interesting if any other hallucinated persons were visiting [redacted] to talk with [redacted] and try to find out by subtle questions just what [redacted] knowledge of the Jung sciences was and what his viewpoint on the Jung-Spielrein [redacted] experimentation. C, D, F, C
