CERTIFICATION

This is to certify that I have received an accounting for MKULTRA Sub-project 109, Invoice 3, which reflects expenses in the amount of $21,080.00. This accounting is being retained in the project file and is available for review by the specially designated certifying officer.

I further certify that to the best of my knowledge and belief, the expenses listed in the accounting were for the purposes authorized in the approved activity.

DRAFT

15 November 1962

MEMORANDUM FOR : THE RECORD

SUBJECT : MKULTRA, Subproject 109

1. The purpose of this subproject is to provide funds for the continuation of a study of potential psychopharmacological agents. In particular, studies will be directed to the elucidation of interrelationships between molecular constitution and biological response. Studies will be conducted into the biochemical characteristics of certain types of Chemical moieties which are of interest to TSD/BB in carrying out its program on the development of means to control Human Behavior.

2. The attached Budget indicates the extent of the investigations that will be carried out under the direction of Dr. [redacted] in facilities available at the [redacted] The funds for this project will be transferred using the [redacted] as a cutout.

3. The studies being carried out under this subproject were originally planned to cover a period of approximately five years based upon the attached proposal. However, the change in emphasis

[redacted]

109-3.4

[redacted] 109-15

of the present TSD program requires that these plans be altered considerably. The investigation has therefore agreed to produce as many actual end-item compounds as possible during the next year and also to consider this as the final year of the project. For this reason the attached budget has been scaled down from the original estimate of $29,578.00 to $21,080.00. The lower figure reflects mostly lowered personnel costs occasioned by the simpler developmental activities now planned.

4. The cost of this program for a period of one year will not exceed $21,080.00 to which must be added the four per cent fee to the [redacted] making the total amount $21,923.20. Charges should be made against Allotment No. 3125-1390-3902.

5. The [redacted] requires that the [redacted] submit to them a summary accounting on an annual basis of all monies received from the [redacted] Also, unexpended funds will be returned by the [redacted] as soon as possible upon the close of the grant year.

6. A requirement for a six months' informal accounting on the part of the principal investigator is waived.

7. It is not anticipated that any permanent equipment will be needed for this program.

[redacted]

[redacted] 109-3

[redacted]

109-15

8. In connection with travel under this project, it is agreed that the Agency will accept the travel documentation and accounting which conform with the practices of the [redacted] B

9. It is agreed that technical reports reflecting the progress of the research program shall be submitted at mutually acceptable intervals.

10. All personnel connected with the planning and monitoring of this program possess TOP SECRET Agency security approval.

11. This project will be unclassified after it leaves the [redacted]

PROPOSED RESEARCH PROJECT
TO BE SUPPORTED
BY THE [redacted]
AT THE [redacted]
(Effective July 1, 1960)

Project Title: The Synthesis and Biochemical Evaluation of Potential Psychopharmacological Agents.

Principal Investigator: [redacted] Ph.D., Professor and Head of the Department of Pharmaceutical and Medicinal Chemistry, College of Pharmacy.*

For the past several years, the applicant has been engaged in research involving (I) the synthesis of organic entities having potential effects upon the central nervous system, and (II) the evaluation of connections between the chemical and pharmacodynamic properties of these compounds. The applicant is primarily interested in the fundamental study of relationships between molecular constitution and biochemical response, and is particularly concerned with the effect of gradual changes in the chemical structure of synthetic entities upon isolated enzyme systems. The reader is referred to (A) reports submitted earlier to the [redacted] [1-7], and (B) published accounts [8-19] for supplemental information.

The applicant plans to continue his investigation in accordance with the principles set forth in the cited communications. Specifically, he intends to:

1. Synthesize several series of new compounds patterned after (a) organic amines known to affect the central nervous system, and (b) moieties acknowledged as substrates in enzyme systems implicated in the pharmacodynamics of compounds possessing psychopharmacological properties. The member compounds of each series will be designed with gradual changes in their constitution, or physical properties, or both; furthermore, they will be planned in such a manner that potential differences in the interaction between the member compounds of a given synthetic series and a given enzyme may be interpreted in terms of concepts reasonably well established in contemporary theoretical chemistry.

2. Study the effect of these entities upon (a) isolated enzyme preparations believed to be associated with brain function, and (b) other plausible biochemical systems.

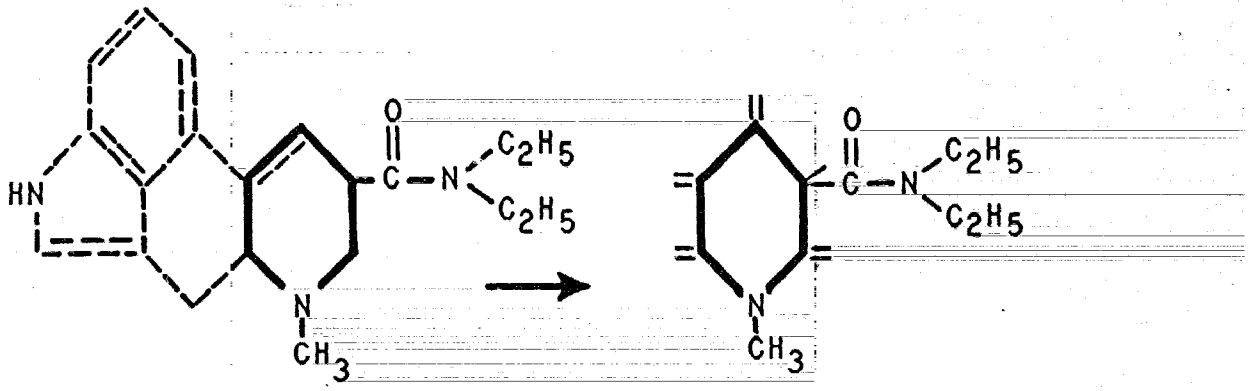

3. Explore relationships between the biochemical activity of each series of derivatives, and the successive changes in the chemical and physical characteristics of the member compounds.

***

At present, our synthetic work is centered around series of arylalkylaminoalkylacetamides, and pyridine- and piperidinecarboxamides which could be visualized as moieties derived from the psychotomimetic molecule LSD (see Figures I, II, III and IV; other series have been planned).

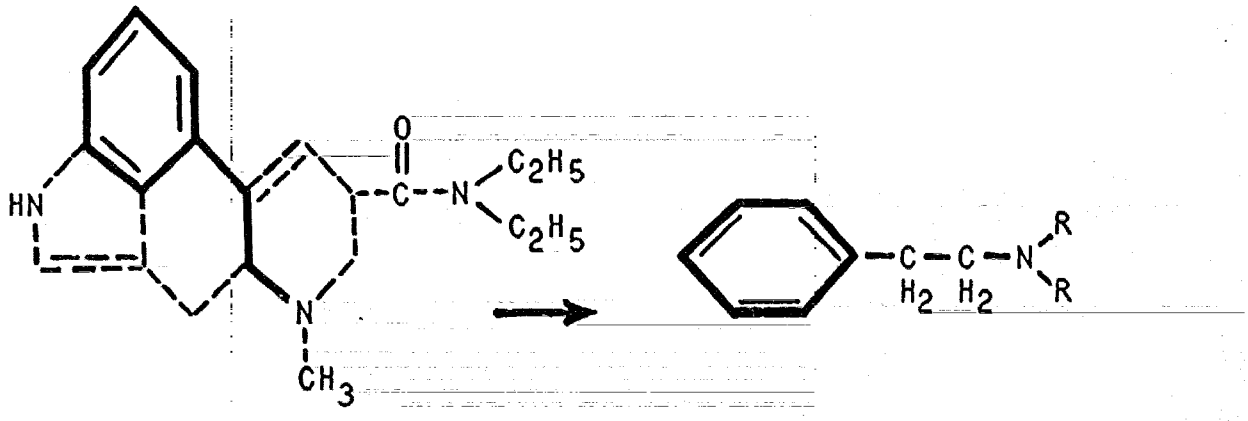

Concurrently, the completed compounds are being evaluated in isolated cholinesterase systems in which LSD has shown remarkable specificity. Our manometric procedures

* Effective July 1, 1960 (on leave of absence July 1, 1960 through June 30, 1961).

LSD

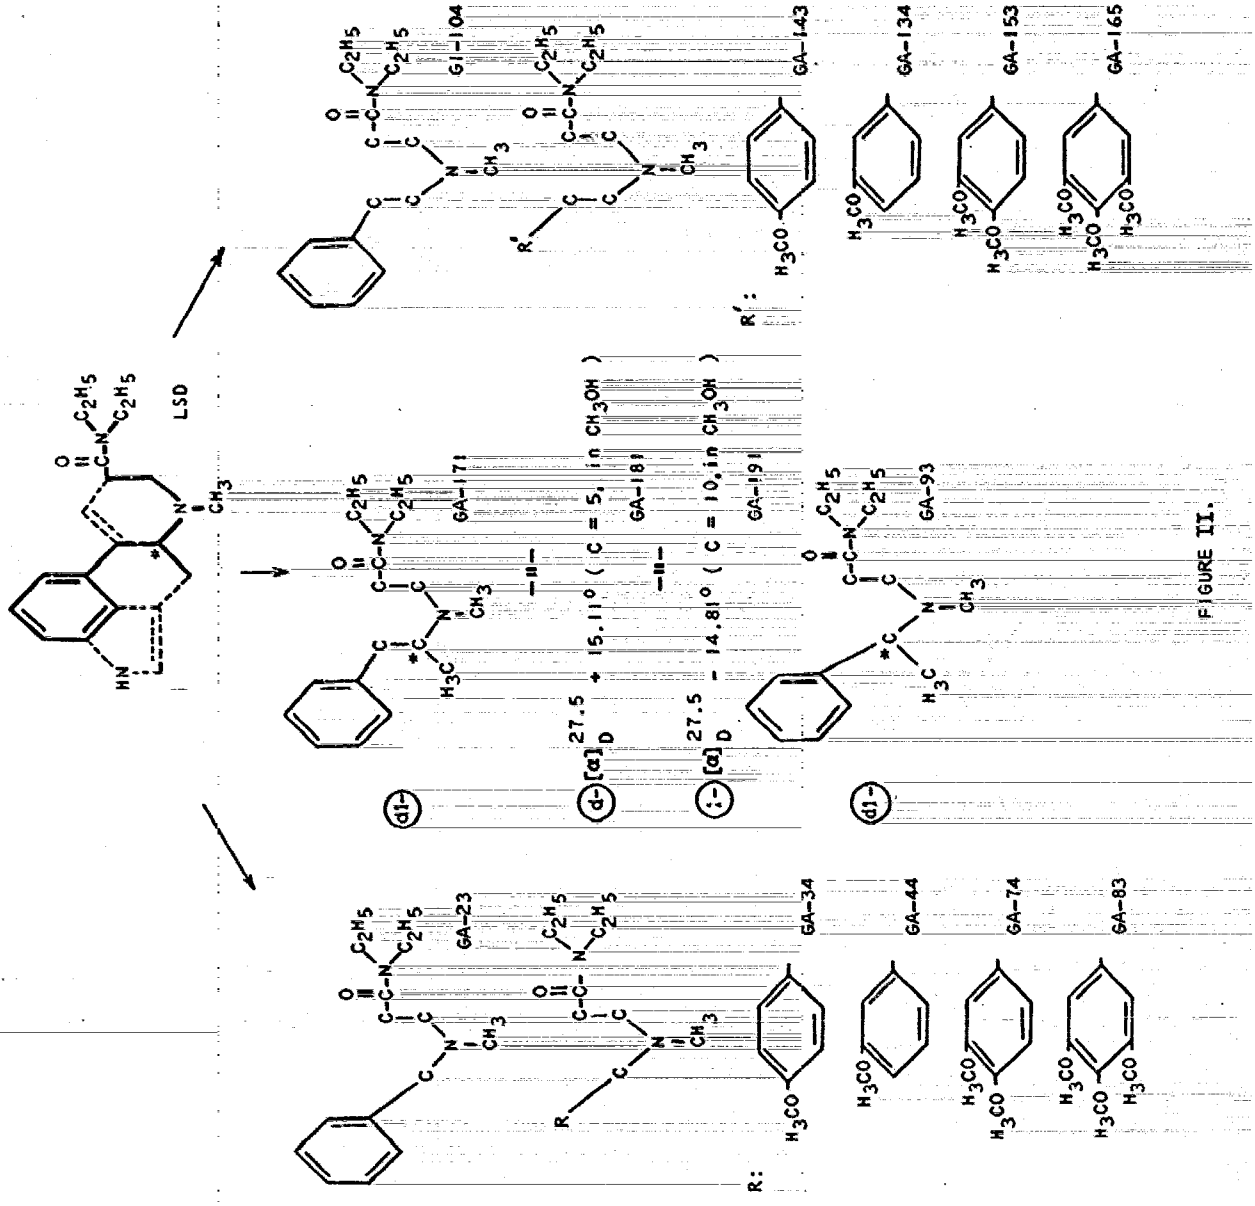

FIGURE II.

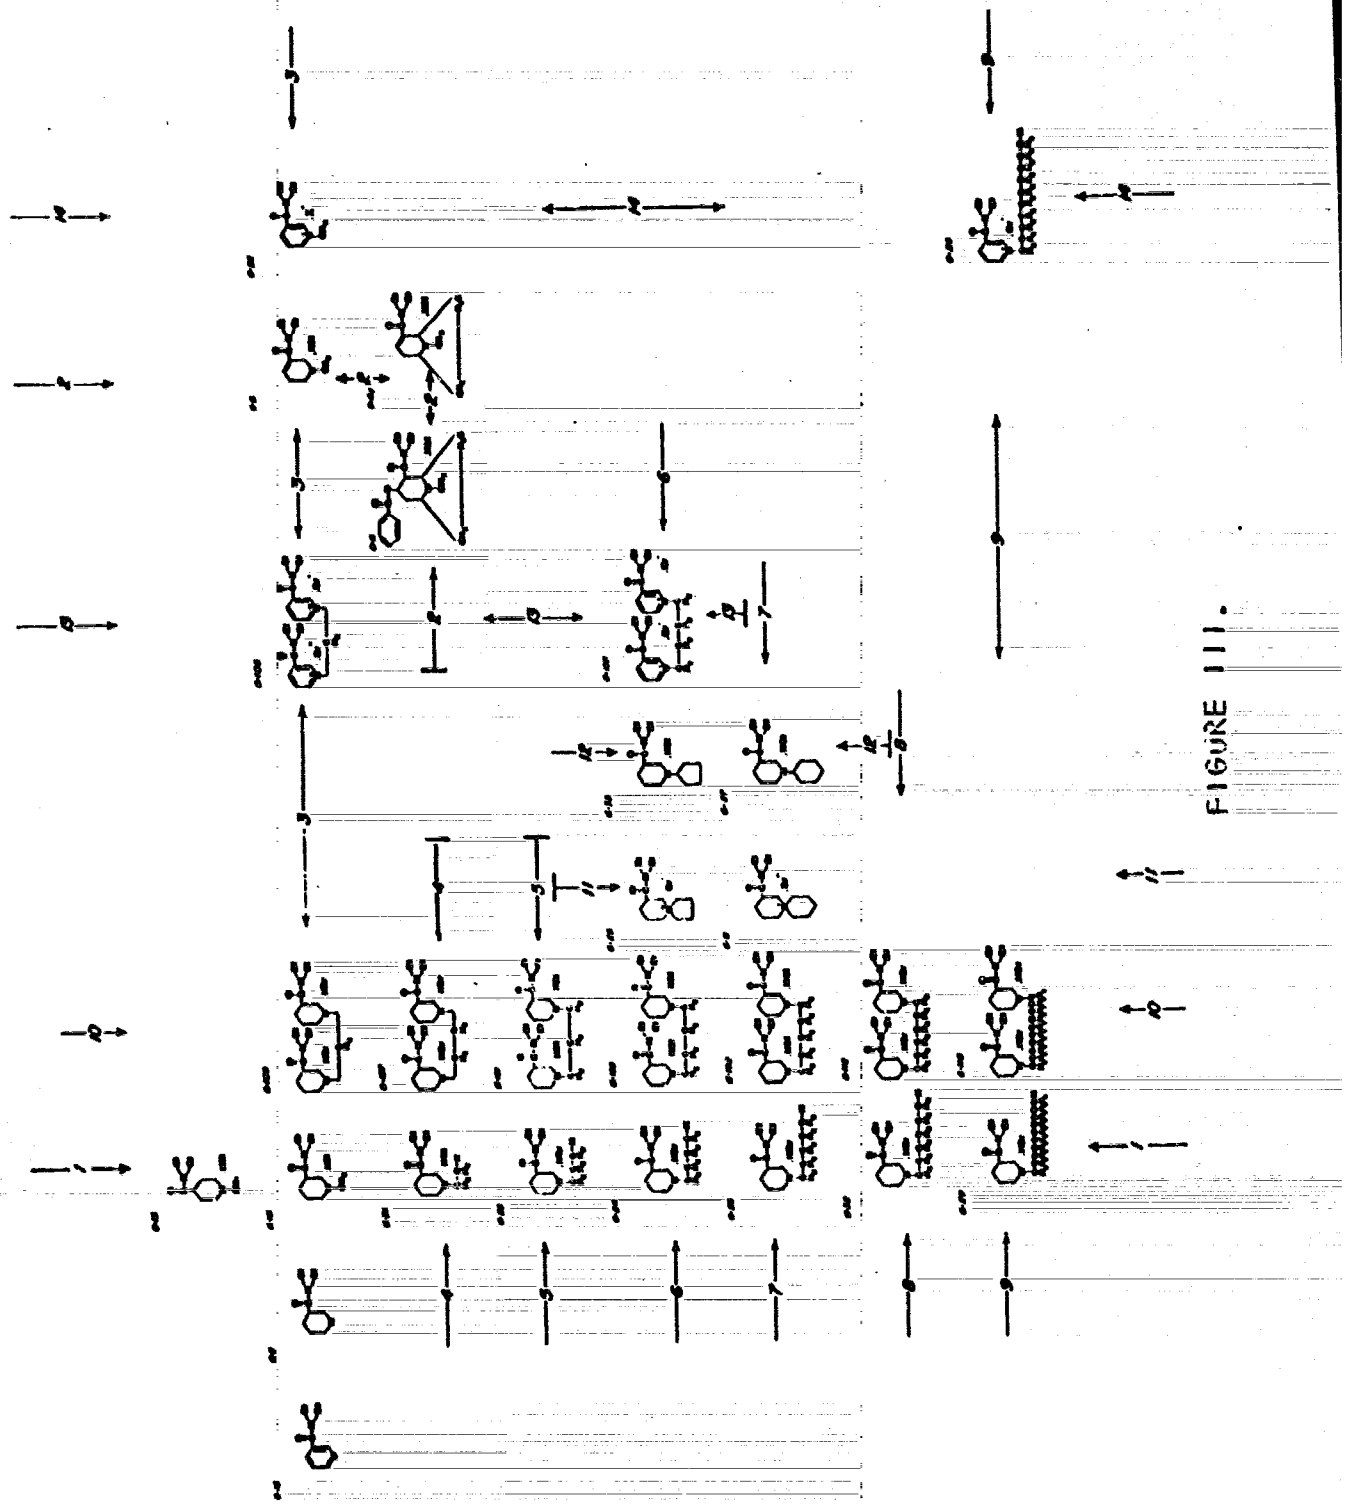

FIGURE III.

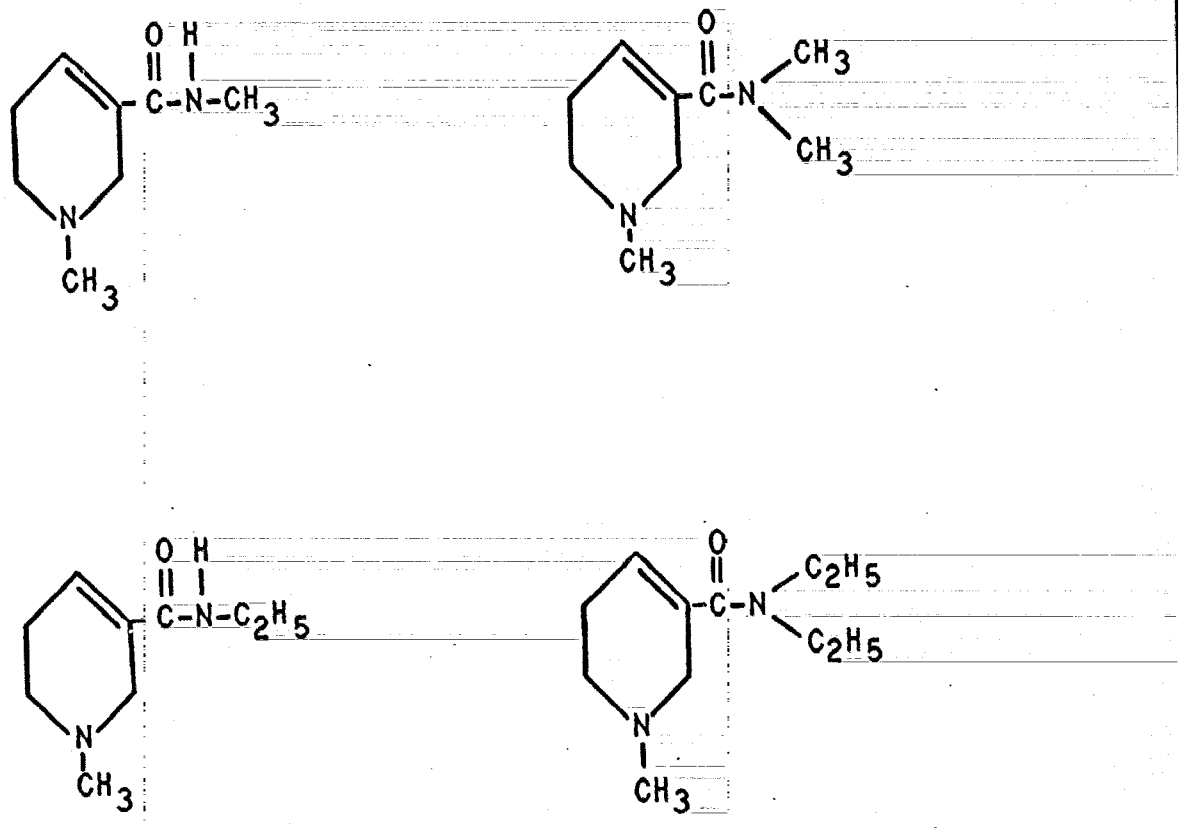

FIGURE IV.

yield very precise measurements of activity in isolated pseudo- and acetylcholinesterase systems, and enable us to evaluate the significance of even minor variations in activity due to small constitutional changes in a series of molecules.

We are aware of the fact that the effectiveness of a psychopharmacological agent in vitro cannot be interpreted as evidence for the involvement of the specific enzyme in the mechanism of psychotomimetic responses. Yet even without conclusive causal connection, this approach may furnish valuable information on the nature of psychopharmacological agents.

***

It is felt that this investigation may yield (a) information assisting the elucidation of interrelationships between molecular constitution and biological response, (b) better insight into the biochemical characteristics and therapeutic potentialities of certain types of moieties, (c) several series of new organic compounds and information about their physical characteristics, and (d) data supplementing our knowledge of the neurochemical processes associated with the action of psychopharmacological agents.

PROPOSAL FOR ESTABLISHMENT OF FACILITIES FOR PSYCHOTOMIMETIC DRUG TESTING

First Year:

Survey of promising compounds

Literature review
Visits to sources, seminars
[redacted] suggestions

"Practice" trials—reproduce established results

Effects to be screened:
convulsants - anticonvulsants
specific arterial dilators - constrictors - antiserotonin effect
cholinesterase inhibitors
sympathomimetic-parasympathomimetic

BUDGET - INITIAL STAFF

Neurologist - principal investigator	$ 3,000
Clinical pharmacologist	14,000
Research assistants	10,000
Statistician services (part time)	1,200
Resident assignments (8 mo.-$300/mo.)	2,400
Equipment and supplies e.g. calculator, camera, E.E.G. service, computor service	4,000
Travel	600
Total	$35,200

To the budget figures must be added 7% of personnel budget for retirement and 15% of overall costs for overhead.

FACILITIES FOR PSYCHOTOMIMETIC DRUG TESTING (CONTINUED)

Second Year:

Trials of new compounds

Screening potentially valuable effects

Chronic toxicity in animals

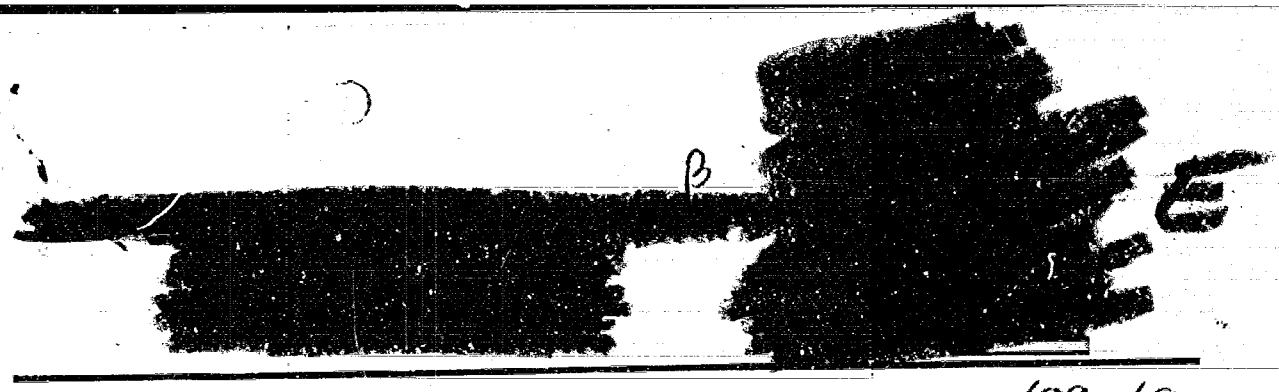

Human trials - double blind and/or concurrent trials:
- psychological effects
- autonomic effects
- anticonvulsant
- antispasmodic
- anticholinesterase (limited, on myasthenia gravis patients)
- antiserotonin ("cluster" headaches)

BUDGET - SECOND YEAR STAFF

Neurologist - principal investigator	$ 3,000
Clinical pharmacologist	14,000
Experimental psychologist	10,000
Research assistants	10,500
Statistician services	1,200
Clerk-statistician	3,000
Resident assignments	3,600
Equipment and supplies (including animals and care)	5,000
Travel	400
Total	$50,700

(+ 7% personnel for retirement)
(+15% overall for overhead)

It may be advisable also to consider the addition of a basic pharmacologist to the staff in second (or third) year.

MEMORANDUM FOR: The Record

SUBJECT : MKULTRA, Subproject 109, Cost of Equipment Exceeded Budget Estimate

1. The Budget Proposal for Subproject 109, dated 22 January 1960, had a proposed figure of $5,000.00 for supplies and materials. There was no anticipation of any equipment.

2. An accounting report has been received for the period 1 July 1960 through 30 November 1961. This report reflected expenditures of $7,061.55 for supplies and materials, and $6,324.93 for equipment. These amounts exceeded the figures in the original proposed budget.

3. This equipment was expendable and the expenditures have the approval of TSD/RB as being essential for the successful completion of the research work that was conducted.

VIA : TSD/Budget Officer

SUBJECT : MKULTRA, Subproject #109, Invoice #1
Allotment 0525-1009-4902

1. Invoice #1 covering the above subproject is attached. Payment should be made as follows:

Cashier's check in the amount of $21,080.00, drawn on a [redacted] E

Cashier's check in the amount of $843.20, drawn on a [redacted] E

Each check should be made payable to the [redacted] B

2. Please forward the checks to Chief, TSD/Research Branch through TSD/Budget Officer by 15 August 1960.

3. This is a final invoice. However, since it is anticipated that additional funds will be obligated for this project, the files should not be closed.

DRAFT
19 February 1960

MEMORANDUM FOR: THE RECORD

SUBJECT : MKULTRA, Subproject 109

1. The purpose of this subproject is to provide funds for the continuation of a study of potential psychopharmacological agents. In particular, studies will be directed to the elucidation of interrelationships between molecular constitution and biological response. Studies will be conducted into the biochemical characteristics of certain types of moieties which are of interest to TSS/CD.

2. The attached budget indicates the extent of the investigations that will be carried out under the direction of Dr. [redacted] C in facilities available at the [redacted] B The funds for this project will be transferred using the [redacted] B for [redacted] B as a cut out.

3. The cost of this program for a period of one year will not exceed $24,080.00 to which must be added the four per cent fee to the [redacted] B making the total amount $25,043.20. Charges should be made against Allotment No. 0525-1009-4902.

4. The [redacted] B requires that the [redacted] B submit to them a summary accounting on an annual basis of

[redacted]

all monies received from the Fund. Also, unexpended funds will be returned by the [redacted] as soon as possible upon the close of the grant year. B

5. A requirement for a six months' informal accounting on the part of the principal investigator is waived.

6. It is not anticipated that any permanent equipment will be needed for this program.

7. In connection with travel under this project, it is agreed that the Agency will accept the travel documentation and accounting which conform with the practices of the [redacted] B

8. It is agreed that technical reports reflecting the progress of the research program shall be submitted at mutually acceptable intervals.

9. All personnel connected with the planning and monitoring of this program possess TOP SECRET Agency security approval.

10. This project will be unclassified after it leaves the [redacted] B
