11 June 1964

MEMORANDUM FOR : THE RECORD

SUBJECT : MKULTRA Subprojects 70, 91, 94 and 135

B

Since the completion of the audit of Project MKULTRA for the period 1 August 1960 through 31 January 1963, accountings have been received from [redacted] in the amount of $93,677.50. This amount is part of the $153,117.93 balance to be accounted for by [redacted] —B

B — [redacted] grantees at the end of the audit period.

Subproject 70 incurred direct costs of $2,518.34 and $27,872.16 transferred from Subproject 94, for a total of $30,390.50. Subproject 94 incurred expenses of $71,324.87, but transferred $4,165.71 to Subproject 91 and $27,872.16 to Subproject 70, leaving a net cost of $39,287.00. It was decided to divert the funds for Subproject 135 to Subproject 91, therefore these costs were included in the accounting from Subproject 91.

Inasmuch as: 1) all four of the subprojects had the same basic research goal in mind, 2) the great length of time that has elapsed since the grants were made, and 3) the difficulty in getting accountings of any sort from the grantee, it is recommended that we facilitate this matter by accounting for the balances as shown in the Confidential Funds Division 760 account for these subprojects.

The above has been concurred in by [redacted] A and [redacted] A of the Audit Staff.

MEMORANDUM FOR: THE RECORD

SUBJECT : MKULTRA, Subproject No. 70

1. The purpose of this subproject is to provide funds for continuation of research on the "K" (unconsciousness producing) problem.

2. There exists within the Agency a continuing requirement for highly potent, quick-acting substances that will render an individual helpless and immobile, preferably in an unconscious state. It is anticipated that this program will provide fundamental information needed for solution of this problem. The scope of this research program is intended to cover investigations on the mechanisms in which certain drugs induce anesthesia or narcosis, elucidate the basic mechanisms of action involved and uncover and evaluate materials which have value because of their potency, physical characteristics, and biological activity.

3. While information and materials available to date are inadequate to satisfy Agency requirements, there are model compounds which, because of their potency, biological activity, or

RESEARCH PROPOSAL

It is proposed to continue basic research on sleep and unconsciousness along the lines laid down by the Sponsor and his technical consultants. The principal investigator will exert his best efforts in conducting research to define the mechanisms underlying production of involuntary sleep and to differentiate the mechanisms involved in the production of this form of unconsciousness from other states of unconsciousness or related behavior. Because of the generally poor state of knowledge in this area of work and furthermore, because of the peculiar requirements of the Sponsor as distinguished from the usual medical requirements, it is understood that the major framework of the research design for this work will be provided by the Sponsor.

Reports will be rendered on progress of such studies and investigations as significant advances are accomplished.

[redacted] A

Chief
TSS/Chemical Division

18 July 1960

Recent technical developments and the continuing availability of adequate research facilities, along with the increased pressure on the production of a practical end product related to this project, indicate that there will be a continuing and probably increased effort in this area. In view of this, it has been decided that the funds mentioned above will be retained for use in connection with the next re-financing of this project, rather than being carried over to some other subproject by the usual procedure. This project will, as presently scheduled, be refinanced on a continuing basis in October 1960.

MEMORANDUM FOR: THE RECORD

SUBJECT : MKULTRA, Subproject 70

1. The purpose of this subproject is to provide funds for a continuation of research on the "K" (knock-out) problem.

2. There exists within the Agency a continuing requirement for highly potent, quick-acting substances that will render an individual helpless and immobile, preferably in an unconscious state. It is anticipated that this program will provide fundamental information needed for solution of this problem. The scope of this research program is intended to cover investigations on the manner in which certain drugs induce anesthesia or narcosis, elucidate the mechanism of action of such compounds and uncover and evaluate materials which have potential value because of their potency, physical characteristics, and biological activity.

3. While information and materials available to date are inadequate to satisfy Agency requirements, there are model compounds which, because of their potency, biological activity, or chemical characteristics, permit a prediction that an adequate research program stands a good chance of developing a material suitable for operational use.

4. The [redacted] will serve as

cut out and cover for this subproject. The necessary research and development will be conducted by [redacted] who will submit to the [redacted] a summary accounting of funds received from the foundation and will return any unused funds remaining at the conclusion of the program. The estimated cost of the work for a period of one year is $30,900.00. To this sum must be added a four per cent service charge for the [redacted] amounting to $1,236.00 making the total cost of this program $32,136.00.

5. Total cost of the project for one year will not exceed $32,136.00. Charges should be made against Allotment No. 0525-1009-4902.

6. It is not anticipated that any permanent equipment will be required for this program.

7. Documentation and accounting for travel expenses which are reimbursable by [redacted] will conform to the accepted practices of that organization.

8. The requirement for a semi-annual informal accounting on the part of the principal investigator is waived.

[redacted] B

June 5, 1958

Dear Sirs :

As you know, the [redacted] is moving from [redacted] down to [redacted] in the early part of the coming year. On a phasing out schedule, many of the Departments, including Neurology, are to commence moving of facilities and personnel starting January 1959. You can not imagine the chaos and turmoil already in progress. For all intent and purpose, I would say that any productive work would not be forthcoming for the next two, if not three, years.

Since the completion of the new medical school is behind schedule, it would be difficult to predict when adequate space will be available for all the different departments. It has already been determined that doubling up of both research and clinic space will be the order of the day.

As an interim procedure, many of the research sections have looked to the use of outside laboratory facilities to fill the gap that will exist at school. The University recognizes the urgent need and necessity of outside facilities and will authorize the use of same.

In order to conduct my activities in a smooth and orderly fashion, I would like permission to place my second year of research in an outside laboratory facility, namely, [redacted] B Preliminary discussions with the Dean of the Medical School show no objections on his part to the use of the facility.

If the relocation of the research project is accecptable, please notify me at the earliest opportunity. Your support has been greatly appreciated.

Yours truly,

[redacted] C

Associate Clinical Professor

MEMORANDUM FOR: THE RECORD

SUBJECT: MKULTRA Subproject 70

1. The purpose of Subproject 70 is to initiate research work on the "K" (Knockout) Problem at the [redacted]

2. The scope of the research program is outlined in the attached research proposal. There exists within the Agency a continuing requirement from the Operating Divisions for a substance or substances that will render an individual or animal helpless and immobile, either consciously or unconsciously, until definite control measures can be instituted. It is envisioned that this program will supply some of the answers so sorely needed.

3. It is expected that [redacted] will monitor and direct and actively participate in this project as principal investigator from the [redacted] where arrangements have been made for his appointment as an [redacted]

4. In view of the magnitude and scope of the project, it is felt that a two-year period is required for realization of some answers to this intricate and complex problem. Therefore, a two-year research proposal is attached. The cost of this program is estimated at $21,840.00 for the first year; $25,422.00 for the second year; for a total of $47,262.00. To this sum must be added $1,890.48 representing a four percent service charge to the [redacted] making the total amount for two years $49,152.48. The Foundation will function as cutout and cover for this grant. The cover title of the project is [redacted] and is presumably being supported by a research grant from the Foundation.

5. The total cost of the project for a period of two years will not exceed $49,152.48. Charges should be made against Allotment 7-2502-10-001.

THE "K" PROBLEM

There exists within the Agency a continuing requirement from the Operating Divisions for a substance or substances that will render an individual or animal helpless and immobile, either consciously or unconsciously, until definite control measures can be instituted. The instances and situations where such an advantage can be utilized are too numerous to be mentioned. Within TSS/CD this problem has been designated the "K" (Knockout) Problem.

From various sources (scientific literature, TSS/CD projects, etc.) numerous bits of disjointed information have been accumulated in this area. Many provocative suggestions were raised that warrant further investigation. To date, there are no active projects or individuals specifically established by TSS/CD for the investigation of this problem. Therefore, this project was designed for the purposes of centralizing all efforts in this field, consolidating the existing data, and initiating active research on some of the many existing provocative suggestions.

The project will be established within the [redacted] B Initially, the research activity will be divided as follows:

I. The Experimental Evaluation of Sedative Agents

A. Tick Paralysis

Certain species of ticks (genus Dermacentor) have been incriminated in a clinical syndrome commonly referred to as "tick paralysis". This syndrome occurs in both man and animals. It results from a tick bite, and is characterized by ascending flaccid paralysis of the musculature. Removal of the tick is usually followed by complete and rapid spontaneous recovery. The etiology of tick paralysis remains obscure. The disease is believed to result from the inoculation of some unidentified tick-generated, toxic substance which appears to be neurotropic.

As a by-product of Project Naomi, a sizeable amount of this neurotropic toxic substance is being isolated. The development and experimental evaluation of this substance as a sedative agent will be carried out within the scope of this "K" Problem project.

E2 IMPDET; CL BY [redacted]

70-35

B. Narcotic Effect of Fatty Acids

As a result of preliminary investigations carried out within MKULTRA Subproject 57 (terminated 31 May 1957), it was found that the parenteral administration of fatty acids induced a state of unconsciousness in small animals which when examined by electroencephalogram techniques turned out to be similar to ordinary sleep. The length of narcosis varied with the dose of the fatty acid administered. Of extreme interest is the fact that fatty acids, unlike other narcotic agents, are normal constituents of the diet and body tissues.

Investigation will be carried out on:

1. Mechanism of fatty acid narcosis,
2. Effective modes of administration other than parenteral, i.e. oral, respiratory,
3. Additional fatty acids - short or long chain, saturated and unsaturated.

C. Assay of New Sedative Agents

The methods usually employed for the assay of sedative drugs are not specifically directed toward the evaluation of sedative activity although all methods utilize one or another of the characteristics of "sleep" as the criterion of effect. In the absence of a pharmacological definition of sleep, evaluation of sedative action has been conducted at different levels of this state, ranging from sleep itself to hypnosis, and even to general anesthesia. It is apparent that the criteria or endpoints employed in such evaluations have either overshot the target of sedation or have not bracketed it adequately. This then leads to a state of general confusion in the evaluation of the newer sedative agents.

To utilize effectively the sedative agents available, both tested and untested, requires the development of a systematic method of testing and systematic method of characterizing the drug, both in terms of the symptomatology produced and in terms of describing potency in producing given effects by means of standardized and valid statistical procedures. An objective report will be designed that will attempt to standardize the reporting procedure for all TSS/CD research

projects employing animal experimental procedures.

II. Incapacitating Agents

As a result of animal testing procedures, a number of centrally acting skeletal muscle relaxants have been found. Several are or have been evaluated clinically in man with varying results. Occasionally, clinical reports appear claiming that certain pharmacological agents that have minimal muscle relaxant effects in some experimental animal preparations produce dramatic relief of spasticity in man. Clinical impressions are the usual criteria of effectiveness.

There exists within the [redacted] B the opportunity for clinical evaluations of some centrally acting skeletal muscle relaxants on the therapeutic relief of spasticity in man.

BUDGET

First year

Neurophysiologist (M.D.)	6,000.00
Research associate (Ph.D.)	4,000.00
Lab technician	3,000.00
Lab assistant and secretary	3,000.00
Equipment, apparatus	2,500.00
Supplies, expendables	1,000.00
	$19,500.00
University overhead (14%)	2,340.00
	$21,840.00

Second year

Neurophysiologist (M.D.)	7,000.00
Research associate (Ph.D.)	4,500.00
Lab technician	3,300.00
Lab assistant and secretary	3,200.00
Equipment, apparatus, etc.	1,500.00
Supplies, expendables, animals	1,000.00
Animal keeper	1,800.00
	$22,300.00
University overhead (14%)	3,122.00
	$25,422.00
