Memorandum t[redacted]

Subject: [redacted] Hungarian Returnee Project

The status on this project is that we are awaiting approval of Mrs. [redacted] final report. We are holding the balance of this account until we are certain that no further expenses will arise.

The following is the status on this project:

Received:		$ 10,620.00
Expenditures:		
[redacted] fees	$6,390.00	
[redacted] expenses	236.72	
Translator fees and expenses	271.50	6,898.22
Balance remaining in Project Account		$3,721.78

The above is a true accounting on this project.

DRAFT [redacted]
15 September 1958

MEMORANDUM FOR: THE RECORD

SUBJECT : Project MKULTRA, Subproject No. 89

1. The purpose of this project is to investigate the sources of disaffection of Hungarian refugees and to determine the cause for voluntary redefection (return) to Hungary. This investigation is undertaken in response to a continuing requirement (a) to elucidate the sources of disaffection of the defectors and (b) to authenticate recommendations on the handling of defectors. The attached proposal summarizes the procedure which will be followed.

2. Mrs. [redacted] C a consultant of [redacted] B has agreed to act as principal investigator. The cover has been the general interest of the Society in coordinating research in all aspects of the Hungarian revolt and refugee problems.

3. The funding and nominal supervision of this project will be handled by [redacted] B in the regular manner. Accounting for the funds expended will be according to the procedures previously established for the Society relative to grants to unwitting agents. Any unused funds remaining at the conclusion of the project will be returned to the Agency. It is not anticipated that

[redacted]

89-17

any permanent equipment will be acquired during the project. Travel funds will be accounted for in a manner consistent with the established practice of [redacted] B.

4. The total cost of this project for a period of one year beginning 2 September 1958 will be $10,620.00. Charges should be made against Allotment 9-2502-15-902.

SUMMARY OF PROSPECTUS - STUDY OF RETURNING HUNGARIAN REFUGEES

Purpose

To determine the factors leading to the critical decision of certain Hungarian refugees in the U.S. to return to Hungary.

Procedure

1. Interviews with returnees: Employing data supplied by [redacted] The interviews will follow the [redacted] case work contacts, oriented primarily to a large schedule of potential causal factors and secondarily to possible remedical action.

2. Control group interviews: A control group matched to the returnee sample but which has not applied for return will also be interviewed.

3. Examination of relevant data on other refugee groups from which there has been a significant sample of returnees.

4. Comparison of returnee sample characteristics with characteristics of refugees studied in the [redacted] study.

Personnel

The principal investigator will be Mr [redacted] an experienced psychiatric case worker who has already participated in the pilot interviews in the follow-up of the Cornell-Rutgers case study.

The principal investigator will be assisted by a suitable part-time interpreter-translator. Clerical assistance will be supplied by [redacted] but statistical and other data processing assistance as required will be performed by part-time help.

Duration

The project is planned for a duration of one year. It is estimated that the interviews will be completed within a period of nine months. The subsequent 3 months will be devoted to final data processing and preparation of reports.

89-18

Estimated Cost for one year:

Principal investigator	$8,000.00
Interpreter-translator (part-time)	2,000.00
Travel	350.00
Telephone and other contact costs	270.00
Total	$10,620.00

C [redacted] Proposal C DRAFT

89-19

1. Background:-

A major focus in the investigation of human ecology is the study of personality and situational determinants of extremely critical decisions made by individuals and groups. The emigrees from the 1956 Hungarian revolt have proved to be a unique source of case material for such a study because:

a. they represent a relatively homogeneous group (national culture, departed at same time under somewhat similar circumstances, etc.)

b. they made two extremely critical decisions—

to leave Hungary

to come to the United States—effort in obtaining a visa

Considerable research has been conducted with the groups of emigrees who came to America, for example:

B [redacted] Medical, psychological, sociological factors in motivation; follow-up of selected cases

B [redacted] (Brief Summary)

B [redacted] (Brief Summary)

B [redacted] (Brief Summary)

B [redacted] (Brief Summary)

A small percentage of this group have made an even more critical decision—to return to Hungary. This group, therefore, would appear to represent a particularly valuable object of study in terms of the personality and situational determinants of each of the three decisions, with special emphasis on the third and most final, but with attention to consistencies and regularities in the process of all three.

It has been reported *that approximately 500 of the 38,000 refugees admitted to United States have already returned. Of these 500, current information indicates that about half are returning as a result of their own decisions: that is, were not forceably repatriated or were not dependents of a family of returnees. It was also reported that not one of the returnees came from the group of 1300 professionals assisted by the NAS in vocational placement. A breakdown of 111 "unable to adjust" and "unwilling" to adjust to the United States was reported. No indication was given of who made this categorization, nor on what data.

2. Research Problem:-

It is proposed to study a sample of Hungarian returnees in order to learn answers to the following questions:

a. What are the determinants of the decision to return?

b. How well do these determinants discriminate returnees from those who stay?

c. How is the decision to return related to earlier decisions to:

(1) leave Hungary

(2) go to United States?

d. What actions prevent (or would have prevented) the decision to return?

3. Determinants to be Investigated and Examples of Hypotheses to be Tested:

a. Demographic - Is it a specific age, sex, occupational, educational, or family status which is returning?

---

* By Mr. [redacted] to a conference on the Hungarian problem sponsored by

B

89-19

b. Social -

(1) Is the kind and amount of assistance in integrating into the American community an important determinant?

(2) Is family separation important?

(3)

c. Economic - Has lack of job opportunity contributed to desire to return?

d. Political - Is political ideology and/or disillusionment with Democracy responsible for a desire to return? Have propaganda or more direct means of influence affected their decision?

e. Psychological - Have specific personality traits or psychopathology influenced the actions of the returnees to an important degree?

f. Cultural - Is identification with the Hungarian culture or institutions of major importance in preventing integration in the American community?

4. Procedure:-

a. Three sets of data to be collected:

(1) Available information on all the Hungarian returnees who have already departed. Information in terms of whatever identifying data is available in the records of [redacted] H various refugee organizations such as [redacted] B and a cross-check of name files of the research groups who have interviewed or questioned refugees. --This data would have to be compared with whatever is available on the refugee group as a whole.

(2) Interviews with as many as possible of those who have currently

requested exit permits, or who so request in the course of the next nine months. Where interviews cannot be arranged, use of a written questionnaire to be administered by whatever cooperating authority that can be arranged. (This will probably require assistance of [redacted] which is still to be obtained.)

(3) Interviews with a matched control group, preferably of those who initiate a request and then withdrew it (size of such a sample and availability of data is still unknown), but possibly substituting individuals of similar age, education, family status, religion, occupational background, etc.

In addition, there will be studies of relevant data and literature on post-World War II returnees of other parolee groups. (e.g. Chinese, Russians.)

b. Analysis of data

(1) The data will be coded into categories relevant to hypotheses and compared, using contingency table analysis--comparing returnees with total refugee group where data is available and with control group where data is unavailable on larger sample.

(2) A clinical analysis of intensity and implications of significant differences.

(3) Cross validation through "blind" prediction

c. Reporting

(1) A brief technical report will be prepared

(2) A non-technical summary oriented toward welfare groups and government

89-19

agencies concerned with refugee problems in general

5. Research Personnel:-

a. Principal Investigator [redacted] (see attached vita)

A social worker, Mr. [redacted] brings to this study:

(1) experience in field interviewing on sensitive topics

(2) cross-disciplinary orientation

(3) familiarity with social rehabilitation specifically refugee groups

(4) familiarity with Hungarian Refugee group

b. Clerical and Non-Professional

(1) qualified interpreter when and as required

(2) clerk-typist on part time

6. Budget:-

Salaries	$10,000.00
Travel	350.00
Telephone and Message	270.00
	$10,620.00
