B

Project MKULTRA, Subproject 91

Date Initiated: 15 January 1959

Date Expires: 1 February 1962

Funds-current year: $48,000

Purpose: To provide an advanced animal screening and pre-clinical pharmacological testing of toxics and drugs affecting human behavior with special reference to drug effects and molecular structure relationships and avoidance of undesirable effects.

Status: A continuing program of ad hoc screening and testing utilizing protocols provided by and closely monitored by TSD.

[redacted]

11 June 1964

MEMORANDUM FOR : THE RECORD

SUBJECT : MKULTRA Subprojects 70, 91, 94 and 135

Since the completion of the audit of Project MKULTRA for the period 1 August 1960 through 31 January 1963, accountings have been received fro[redacted] in the amount of $93,677.50. This amount is part of the $158,117.93 balance to be accounted for by [redacted] grantees at the end of the audit period.

Subproject 70 incurred direct costs of $2,518.34 and $27,872.16 transferred from Subproject 94, for a total of $30,390.50. Subproject 94 incurred expenses of $71,324.87, but transferred $4,165.71 to Subproject 91 and $27,872.16 to Subproject 70, leaving a net cost of $39,287.00. It was decided to divert the funds for Subproject 135 to Subproject 91, therefore these costs were included in the accounting from Subproject 91.

Inasmuch as: 1) all four of the subprojects had the same basic research goal in mind, 2) the great length of time that has elapsed since the grants were made, and 3) the difficulty in getting accountings of any sort from the grantee, it is recommended that we facilitate this matter by accounting for the balances as shown in [redacted] account for these subprojects.

The above has been concurred in by [redacted] and [redacted] of the Audit Staff.

[redacted]
Chief Scientist, TSD

91-4

Per conversation w/ [redacted] (A) & [redacted] (A) 28 MAY 1964

O.K. to turn in acctgs on Sub-Projects 70, 94 and 135 as done. Inasmuch as it is so long after the fact, and the difficulty in getting acctgs of any sort, we can use the acctgs as recd. Cross-reference the switching among the projects. Anyway, [redacted] (B) was involved in all three. [redacted] (A) & [redacted] (A) of Audit Staff are aware of these problems & concurs. If possible have someone in authority sign memo for record explaining reasons for doing such.

91-5

Conversation w/ A [redacted] 24 MAR 1984

C [redacted] retains all the books + records of difunct B [redacted]. He has submitted preliminary acctgs for Sub 90-4, 91-5, 91-8. Once he is able to thordy analyze all the books + records he will turn in complete, finalized accountings for these projects. These three projects all had the same goal, which was the drug. That's why they felt justified in shifting the money around. A [redacted] feels it probably would have been better if only one, rather than four (all 135 projects was written + authorized. A [redacted] + C A [redacted], Audit Staff, are dealing directly w/ [redacted] + are aware of our problems in getting satisfactory acctgs for these projects. Audit feels C [redacted] is "good" for these acctgs which they are also waiting for. Therefore with the above knowledge, we'll hold these "prelim" acctgs, until C [redacted] has prepared the "finals," which should be ready in the very near future.

MEMORANDUM FOR: THE RECORD

SUBJECT : Project MKULTRA, Subproject No. 135,
Change of Facility in which Work is Performed

1. The original purpose of this subproject was to evaluate a number of candidate chemical agents in facilities and under the direction of individuals who, if later developed, became unavailable for this purpose due to unforeseen circumstances.

2. In the meantime, the funds for this subproject were transferred to the output in anticipation of the commencement of the work.

3. In view of the security difficulties involved in the actual return of funds from the output and also since another subproject (#91) was being served by the same output, and furthermore, since subproject #91 was capable of providing its services on these chemical agents of interest and during the same fiscal year, it has been decided to divert the work intended for subproject #135 to the facilities of subproject #91. No significant change in funding or variation in fiscal year is concerned in this matter.

MEMORANDUM FOR: THE RECORD

SUBJECT : Continuation of Project MKULTRA, Subproject 91
Authorization #5

1. The purpose of this subproject is to provide funds to continue the research program which furnishes advanced animal screening and preclinical pharmacological testing required by the program on the development of new psychochemicals. The program is providing fundamental information bearing on the problem of structure activity relationships among these compounds.

2. The research group conducting the investigations are exerting their best efforts to provide the data requirements imposed on them. The experimental work being carried out under this project is oriented and programmed to meet our planned research and development needs. In order to bring the program into alignment with contemplated researches and possible modifications that may be dictated by anticipated results from the current research, this program will be extended for a six month period. are you ?

3. The cost of this program for a period of six months beginning 1 August 1961 is estimated to be $24,000.00. To this sum must be added $960.00 representing a four per cent service charge to [redacted] who will act as cut out, so that the total cost of the project will not exceed $24,960.00. Charges should be made against Allotment No. 2125-1390-3902.

[redacted]

4. [redacted] has requested that [redacted] submit to them a summary accounting of funds received from [redacted] and that they return any unused funds remaining at the end of the grant period.

5. It is not anticipated that any permanent equipment will be required for this program.

6. It has been agreed that documentation and accounting for travel expenses which are reimbursable shall conform to the accepted practices of the organization conducting the research.

7. The requirement for a semi-annual informal accounting on the part of the principal investigator has been waived.

8. All personnel connected with the planning and monitoring of this program possesses Agency TOP SECRET approval. The project will be unclassified after it leaves the [redacted]

PROPOSAL

It is proposed to continue certain biological tests of a pharmacological nature as directed by the Sponsor of this project on chemical materials and extracts to be furnished by the Sponsor. These tests involve small animal studies and/or clinical work in certain cases as indicated in each particular instance. The sponsor will have full control of the methods and procedures to be followed in the work and it is understood that these will vary during the course of the project depending upon research findings in other facilities working in this same general biological program.

In addition, as time and funds allow, pilot experiments will be performed utilizing various known substances having effects on the central nervous system in an effort to refine and improve the present capability of detecting and characterizing such activity in small animals. Attention will also be given to the problem of extrapolation of results between various species of animals.

It is expected that the attached budget will be required to carry out the program outlined above for a period of six months.

MEMORANDUM FOR THE RECORD

SUBJECT: Project MKULTRA, Subproject 91

1. The purpose of this subproject is to provide funds to continue the research program which furnishes advanced animal screening and preclinical pharmacological testing required by the program on the development of new psychochemicals. The program is providing fundamental information bearing on the problem of structure activity relationships among these compounds.

2. The research group conducting the investigations are exerting their best efforts to provide the data requirements imposed on them. The experimental work being carried out under this project is oriented and programed to meet our planned research and development needs. In order to bring the program into alignment with contemplated researches and possible modifications that may be dictated by anticipated results from the current research, this program will be extended for a six month period.

3. The cost of this program for a period of six months beginning 1 February 1961 is estimated to be $24,000.00. To this sum must be added $960.00 representing a four per cent service charge to the [redacted] who will act as cut out, so that the total cost of the project will not exceed $24,960.00. Charges should be made against Allotment No. 1125-1390-3902.

[redacted]

9/20

4. [redacted] has requested that [redacted] submit to them a summary accounting of funds received from [redacted] and that they return any unused funds remaining at the end of the grant period.

5. It is not anticipated that any permanent equipment will be required for this program.

6. It has been agreed that documentation and accounting for travel expenses which are reimburseable shall conform to the accepted practices of the organization conducting the research.

7. The requirement for a semi-annual informal accounting on the part of the principal investigator has been waived.

8. All personnel connected with the planning and monitoring of this program possesses Agency TOP SECRET approval. The project will be unclassified after it leaves [redacted]

PROPOSAL

It is proposed to continue certain biological tests of a pharmacological nature as directed by the Sponsor of this project on chemical materials and extracts to be furnished by the Sponsor. These tests involve small animal studies and/or clinical work in certain cases as indicated in each particular instance. The sponsor will have full control of the methods and procedures to be followed in the work and it is understood that these will vary during the course of the project depending upon research findings in other facilities working in this same general biological program.

In addition, as time and funds allow, pilot experiments will be performed utilizing various known substances having effects on the central nervous system in an effort to refine and improve the present capability of detecting and characterizing such activity in small animals. Attention will also be given to the problem of extrapolation of results between various species of animals.

It is expected that the attached budget will be required to carry out the program outlined above for a period of six months.

DRAFT
18 September 1959

MEMORANDUM FOR: THE RECORD

SUBJECT : Supplement to Project MKULTRA, Subproject 91

1. The purpose of this supplement is to provide additional funds to carry out an expanded animal screening of selected compounds directly related to the development of new chemicals which influence human behavior. The program provides fundamental information on structure-activity relationships among new psychochemicals. It will provide an insight into the activity of chemical compounds of possible value for operational applications. The studies are directed toward elucidating the relationship between this parameter and personality structure and mentation.

2. In order to keep abreast of new compounds which have been recently uncovered and synthesized, it becomes necessary to increase the advanced animal screening. It is expected that results obtained from the advanced screening will provide basic information required for research into the pharmacodynamics of new and more effective compounds. The additional funds required for this program for the year amount to $20,000.00. To this sum must be added $800.00 representing a four per cent service charge to [redacted]

91-32

[redacted] who act as cut out, making the total amount $20,800.00. Charges should be made against Allotment No. 0525-1009-4902.

3. [redacted] has requested that [redacted] submit to them a summary accounting of funds received from [redacted] and that they return any unused funds remaining at the conclusion of the program.

4. It is not anticipated that any permanent equipment will be required for this program.

DRAFT

15 January 1959

MEMORANDUM FOR THE RECORD

SUBJECT: Project MKULTRA, Subproject 91

1. The purpose of this subproject is to provide funds to carry on the advanced animal screening and certain parts of the pre-clinical pharmacology required by the program on the development of new psychochemicals. In addition, this phase of the program will automatically provide fundamental information bearing on the problem of the structure-activity relationships among these compounds. It will also give a better insight into the problem of compound selection for operational applications and the relationship between this parameter and the personality structure of the particular person being studied.

2. Preliminary screening on the materials involved in this study has been carried out at [redacted] over the past three years. During this time the state of knowledge in this area has steadily improved so that it is no longer possible for the work to be carried out by this contractor. The type of experimental work now required in the program is simply far beyond his capability both in terms of equipment and personnel required for the job. For this reason the rate of expenditure at [redacted] on this preliminary screening work has steadily dropped with time while facilities capable of carrying out the more advanced phases of the program were being located. The present view is that with a slight overlap during this year between these projects, [redacted] portion will be phased out at the end of the year to be replaced with this new facility.

3. The experimental design in this subproject is based upon results derived from subprojects 22, 51, 70, 62, 58, 53, 46, 44, 45, the [redacted] work of the past three years, and project [redacted]. The personnel and consultants involved consist of CD/Branch II personnel working with Drs. [redacted] Because the work leads off almost immediately into completely unknown areas, all of these consultants will maintain a very close but informal surveillance of the raw data as the work progresses so as to be able to take advantage of every new development as it comes to light in guiding further work in the project.

4. As indicated in the attached proposal, the cost of this program for a period of one year will amount to $20,500.00. To this must be added a 4% service charge to the [redacted] who will act as cutout so that the total cost of the project will not exceed

[redacted]

[redacted]

DRAFT 91-37

$21,320.00. Charges should be made against allotment 9-2502-75-902.

5. The [redacted] has requested that [redacted] submit to them a summary accounting of funds received from [redacted] and that they return any unused funds remaining at the conclusion of the program.

6. It is not anticipated that any permanent equipment will be required for this phase of the program.

7. It has been agreed that documentation and accounting for travel expenses which are reimbursable by [redacted] shall conform to the accepted practice of that organization.

8. The requirement for a semiannual informal accounting has been waived.

9. All personnel connected with the planning and ~~maintaining~~ monitoring of results of this program possess Agency TOP SECRET approval, however none of the personnel of [redacted] with the exception of [redacted] is cleared and none will be made witting of Government interest. The project will be unclassified after it leaves the [redacted]

Attachment - Proposal

[redacted]

91-37
15 January 1954

PROPOSAL

It is proposed to conduct certain biological tests of a pharmacological nature as directed by the Sponsor of this project on chemical materials and extracts to be furnished by the Sponsor. These tests may involve enzyme preparations, small animal work and/or clinical work in certain cases as indicated in each particular instance. The Sponsor will have full control of the methods and procedures to be followed in the work and it is understood that these will vary during the course of the project depending upon research findings in other facilities working in this same general biological program.

In addition, as time and funds allow, pilot experiments will be performed utilizing various known substances having effects on the central nervous system in an effort to refine and improve the present capability of detecting and characterizing such activity in small animals. Attention will also be given to the problem of extrapolation of results between various species of animals.

It is expected that the attached budget will be required to carry out the program outlined above for a period of one year.

91-37

BUDGET

Salaries	$12,000
Overhead (25% of Salaries)	3,000
Travel	500
Service (Analytical, etc.)	1,500
Supplies and Materials	3,000
Contingencies	500
Total	$20,500

PROPOSAL

During the past few years a great deal of progress has been made in relation to the function and metabolism of various anatomical divisions of the human central nervous system. This progress has to a great extent been fostered and abetted by the study of the effects of drugs on this very complex system. These drugs have mainly been utilized as tools in attempts to develop the relationships between cerebral metabolic processes and brain function as expressed by individual mood and behavioral changes.

In general, pharmacologists are just beginning to realize the potentialities of work in this field and have not as yet adjusted their research goals and techniques to take full advantage of existing knowledge. The general tendency in this respect is to attempt to apply simple modifications of existing techniques to the study of these phenomena. This approach is useful but entirely inadequate to produce progress consistent with that in other fields of medical research. A further problem of significance in relation to this work is the fact that it has developed to a great extent on the clinical side with far too little attention paid to the general pharmacology of the drugs concerned. Without such basic work progress will continue only on a pure chance basis with little theoretical background.

Therefore, it is proposed to:

1. Design and test methods involving experimental animals which will discriminate between drug-produced, generalized depressed states and generalized excited states of the central nervous system and those particular and specific states or effects which can eventually be related to overt behavioral responses of a sort which entail some possibility of practical exploitation. In this process it would be expected that drugs having a more "pure" type of action than those presently available would be discovered.

2. Discover and test materials having specific effects either in the periphery or the central nervous system which result in the distortion of nerve impulses in the sensory tracts of the nervous system.

3. Validate the above methods and effects in normal humans and relate them to alterations in mood and behavior in as objective a fashion as possible.

4. Establish and maintain facilities for those general pharmacological procedures, i.e., the relationships of the unknown drugs to the known humoral agents, etc., which are necessary in order to describe intelligently the action of the new drugs for their application in the above-mentioned tests.

It is felt on the basis of present knowledge that such a program as that outlined above will go far to bridge the tremendous gap in knowledge which presently exists between known drug-substrate relationships and the overt manifestations of these drugs.

CURRICULUM VITAE

[redacted]

Born [redacted]

Degrees: [redacted]

Academic: [redacted]

Memberships: Society Experimental Biology
Society Pharmacology
Cancer Society
[redacted] Academy of Medicine

Research: Conducted intensive research on: endocrine glands, (insulin, posterior pituitary, thyroid, anterior pituitary) chemotherapy, alcohol, virus and cancer.

Pharmacology of dinitrophenol
