Purpose: An exploratory study concerned with the modulation of light intensity in single crystals by the reversal of orientation of optically active domains in certain ferroelectric crystals. Practical implications include possible new materials and techniques for modulation of light intensity and optical shutters. There is also some support of structural studies of organic materials which have shown semiconductor activity.

Status: The structures of two organic intermolecular complexes have been determined. Crystallographic data on others have been obtained. Optical studies represent graduate student project work which is in progress.

MEMORANDUM FOR: THE RECORD

SUBJECT : Project MKULTRA, Subproject 99

1. The purpose of Subproject 99 is to provide continued support for the work and services of Dr. [redacted] at [redacted] and of various of his co-workers. The work and services are related to certain physical studies which have a definite bearing on various biological and physical problems of interest to the Agency.

2. The project will support studies on the optical rotatory power of solid and liquid crystals, for a period of six months (1 October 1961 through 31 March 1962). Possible practical applications of this work could be practical methods for modulation of light intensity by electrical fields, and the development of simple types of optical shutters. The materials to be studied will, to a large extent, also be of biological interest. The support will be in the form of post-doctoral fellowships for three men who will work under the direction of Dr. [redacted] In addition, the project will provide for the continued services of Dr. [redacted] which will include services as a consultant, preparation of materials in suitable physical forms, and the measurement of various physical properties. These relate to physical studies which are required to develop effective materials which will influence the human nervous system.

[redacted] 99-3

[redacted]

3. The [redacted] will function as a cover and cut-out for the optical rotatory power-studies. The cost of this program for six months will be $9,600.00, to which must be added a 4% service charge for the cut-out ($384.00), making a total of $9,984.00. Charges should be made against Allotment No. 2125-1390-3902. In addition for other services, payment will be made from time to time on the basis of statements submitted by Dr. [redacted] Funds for this have been previously allotted, and the time is hereby extended for a period of one year.

4. No permanent equipment will be acquired. Accounting for funds provided through the [redacted] will conform with the usual practices of the [redacted]

5. The facilities have been inspected and are considered adequate. Dr. [redacted] has been given security approval. His co-workers are unwitting of Agency interest.
