(16-1)

Chief, Medical Division/SI

DEC 9 1952

Assistant Director/SI

O/SI's Future Responsibilities in the Program of ARTICHOKE

1. At a meeting held on 4 December, it was decided that O/SI and therefore the Medical Division of O/SI, would continue to have responsibility for covering foreign intelligence on the subject of ARTICHOKE.

2. The group in control of the program is going to meet regularly at an interval of four to six weeks. The next meeting is to be held on 8 January. At each of these meetings a brief verbal presentation is to be made on the progress which has occurred since the preceding meeting. Would you please be so good as to plan to brief me on the progress which your Division makes in this field just before each meeting.

3. At some subsequent meeting it might be worth while for the man whom you designate to brief the group on our present state of knowledge. If you feel this is advisable I shall be glad to suggest it at the meeting of 8 January.
