MEMORANDUM FOR: Assistant Director for Scientific Intelligence

SUBJECT: Russian Interrogation Methods.

1. Mr. J. Alberti of ONI told the undersigned that a Mr. Jacobsen (fn of State Department, recently returned from Bulgaria (?), had written an extremely interesting report on the Voegler case giving details of Russian methods to obtain confessions. Alberti stated that as far as he knew the State Department had not disseminated this report which was being held by a Mr. Samuel Klaus in State, apparently because of security reasons inasmuch as the report apparently revealed State Department connections with the case.

2. The above is forwarded for your information and file.
