29 August 1957

MEMORANDUM FOR: Chief, OSI/Medical

ATTENTION : [redacted]

SUBJECT : Symposium on "Chemical Concepts of Psychosis"

1. Attached are copies of the author's summaries of the talks to be given at the above symposium as received from our contact.

2. When further material becomes available from this source we will forward copies to you.

[redacted]

Acting Chief
Chemical Division

Distribution:
Orig & 1 - Addresse w/encl

Attached to this memo were summaries of possibly 50 presentations at a scientific/medical meeting. Typical of titles is "Investigation of Metabolic abnormalities in Schizophrenia". Papers were from across the U.S., France, Austria, etc. None were classified. None retained in OTS. (OSI presumably has copies of attachments.)
