We are interested to obtain further info

either,
on a product called MY2 or by a drug similar to it -

This is distributed by Parke-Davis as an anesthetic aid
is considered far superior ~~[illegible]~~ to other agents
such as tertiary amyl alcohol.

Requirements May 3rd.1955

V We should like to know

1: the nature of the interest which [redacted]

[illegible]

and its representative [redacted] have in mushroom studies, including possible use in rubber-production.

2: the identity of such mushrooms of possible strategic significance, medicinal, industrial, psychogenic etc.

3: The sources and scope of research

4: The results obtained thus far and those expected.

VI

We should like to know

1: the nature of the interest which [redacted] has in mushrooms, esp. potent and psychogenic types.

2: the identity of such mushrooms, their sources

3: The scope of research, if any, -- the results obtained and expected.

VII

We should like to know

1: whether [redacted] have a barbiturate called diboral or somewhat like this, said to be a convulsant in excessive amounts

2: whether the same company has available a new compound called velamine or valamid, possibly a psychogenic agent or the newly developped sedative (?)

We should like to have the available literature and samples, if available

3: whether the same company has triasol or trisol, an analog of metrazol, said to be a convulsant in excessive amounts, -- or info who manufactures and distributes this compound.

We should like to have the available literature, and samples, if available
