A/B, 4, 3/15

MEMORANDUM

TO : Chief, [redacted] G

FROM [redacted] A

12 March 1952

Memo No. 2573

SUBJECT: Artichoke Project

1. In view of our recent conversation regarding my participation in the "Artichoke" Program, I have reviewed the project carefully. It is apparent to me at this time that the program, which could enhance G [redacted] capabilities, has progressed at a very slow rate. Some aspects of the program have become stagnant, and still others have not been exploited at all.

2. Accordingly, if I am to assume the responsibility for [redacted] G interests in the program, as well as the general coordination of the "Artichoke" Program for CIA when [redacted], OSI, assumes his A newly anticipated assignment, I feel that a major allotment of my time (possibly as much as 90%) should be expended, at least for the next several months, in promoting, stimulating and forcing the "Artichoke" Program into a productive state or to a logical conclusion.

3. Although the above apportionment of my time will mean that I will have to set aside many duties that I have assumed in [redacted] I will continue to offer such technical service to the group as the occasion may demand. G
