MEMORANDUM

TO : Chief, [redacted] G

THROUGH: [redacted]

FROM : [redacted]

SUBJECT: Request for Special Development

1. It is requested that a small, compact and easily concealed unit be developed that will inject into the tissues of human beings various viscoid and liquid substances.

2. Such equipment may well take a form similar to that of the Shearer "Hypospray" units for the subcutaneous injection of medicinals although it is desired that the developed unit be smaller, more compact, have a large injection capacity and a greater depth of penetration.

3. For use with the above unit it is requested that a loading capsule be developed to hold the injection materials that is both reusable and easily loaded in the field without extensive equipment.

4. Further details can be obtained from [redacted] A of this Division, who is on [redacted]
