[redacted]

A/B, 4, 23/50

Chief, Security Research Staff 20 October 1953

Chief, Technical Branch

[redacted] Proposed [redacted] Trip.

1. [redacted] OSI, is making a personal trip for business reasons to [redacted], leaving Washington, D.C., some day next week. [redacted] is going to [redacted] and return via air at his own expense. He has volunteered to visit, while in [redacted], a number of outstanding authorities and manufacturing establishments in connection with ARTICHOKE-type chemicals and products, if Security will interpose no objections to these visits. His own division, OSI, has no objection to his visiting these various establishments and has assured [redacted] they will provide him with the necessary entree and documents in the event this is necessary, although a great number of these individuals are known to [redacted] personally and no documentation is needed.

2. Set out below is a list of the individuals [redacted] proposes to visit or the manufacturing firms which are engaged in work of interest to us. [redacted] has explained to the writer that by taking certain airlines, he can be routed through some of these areas and that visiting some of these firms will be of little expense to him personally.

1) [redacted] They are interested in the ergot alkaloids and bio-chemical synthesis.

2) [redacted] and are specialists in the development of ergot alkaloids and have worked on the harmine extracts which are known to be of interest to the Soviets.

3) [redacted] is an outstanding authority on psycho-chemicals and amnesias. He was visited by [redacted] recently. [redacted] is a fully cleared Secret contact of this Branch and [redacted] can be easily reached through [redacted]
