ATD 7/5/19

June 2, 1953

Dear [redacted]

Thank you for your very careful report of May 29 and for your continued interest in this matter.

By all means attempt to verify your contention regarding purity and spectral characteristics of the sample in your possession. Perhaps it might be well to record spectral data for each fragment and larger crystal in the small sample.

The procedure followed and the treatment of the sample are left entirely to your own discretion, although I hope that all residues will be saved and be returned to [redacted] when you have completed your work.

With best regards,

Sincerely,

[redacted]

cc - [redacted]
