10 September 1951

MEMORANDUM TO THE FILE

SUBJECT: Visit to [redacted] by [redacted] to see [redacted] on 7 September 1951

1. The sample of the unknown material was delivered by [redacted], in the [redacted] O/O Office at 1430 hours on the above date. [redacted] was informed that:

a. The material was of foreign origin.

b. When injected into any part of the body it was supposed to make the victim amenable to the will of the captor for an indefinite length of time. The victim functions normally in all ways and shows no evidence of narcosis.

c. The material was obtained in July 1951.

[redacted] was instructed not to tell anyone the fact that the sample came from a government agency. He agreed it was best to state that it came from a foreign representative of the company, if he was pressed.

2. [redacted] stated that he would like to have the cooperation of [redacted] of the [redacted] on the problem. He would not speak to him until he had specific approval fr[redacted] stated he had worked with [redacted] and [redacted] jointly on technical matters of great sensitivity before.

3. [redacted] tated that he would be a[redacted] all day Friday, 14 September, and suggested tha[redacted] see him there. As he would be very busy with the International Conclave, he gave [redacted] his home telephone numbe[redacted] suggesting that he try to reach him there if he could get a decision about [redacted] before the weekend was over.

[redacted] at his home 9 Sept 51. He gave permission to phone [redacted] at [redacted] and tell him to use [redacted] if need be.

[redacted] said he did not think [redacted] had actually met [redacted]

A

B/6

In addition to those tested for in the report, outside evidence suggests the possibility of the material containing one or more of the following compounds:

Amphetamine

Amphetamine Sulphate (Benzedrine Sulphate)

Ambasine

Banisa

Bulbocapnine

Caffeine

Cannabis

Carnegine

Chloral Hydrate

Dramamine

Erythroidine

Ephetamine

Eukotal

Harmine

Harmaline

Lysergic Acid

Mescholyl

Mescaline

Metrazol

Pantopone

Pellotine

Pictrotoxin

Piule

Scopolamine

Salsoline

Sodium Evipal

Sodium Rhodonate

Tropanone

1. An unknown liquid, measuring approximately 1.5 cc in volume was personally delivered to the undersigned o/a 11 July 1951 with request for analysis.

2. Request complied with and results are as follows:

a. Original volume - 1.5 cc
After centrifugation - 1.1 cc

b. Reaction - slightly acid

c. Fujiwara test for Chloral Hydrate and Chloroform - Negative (0.4 cc material used)

d. The remaining fluid and the sediment were tested separately for the following:

(1) Barbiturates - Negative

(2) Salicylates - Negative

(3) Atropine, cocaine, codein, quinine, strychnine - Negative

(4) Morphine, theobromine, apomorphine - Negative.
