Dr. Harris Isbell
Director, Addiction Research Center
National Institute of Mental Health
U. S. Public Health Service Hospital
Lexington, Kentucky

Dear Doctor Isbell:

It was a pleasure to talk with you on the telephone and we are looking forward to seeing you on Friday, May 19th. Dr. Ralph Tedeschi will be coming for sure and, if I can, I shall accompany him.

We have a small supply (perhaps two grams) of a mixture of tetrahydrocannabinols at hand. This is, however, old material and is the redistilled "red oil." If a portion of this would be of any use to you, we would be glad to share it with you. If on further discussion, it would seem worthwhile to synthesize a mixture of tetrahydrocannabinols and to share it with you, we would be glad to consider doing so.

We also have a supply of the [illegible] beta analog of tetrahydrocannabinol on hand. It is a mixture of isomers. This is the material with which we have been playing. After we have had a chance to talk with you, you might wish to look at a sample of it.

Dr. Tedeschi is pulling together his data and should have it in good shape to discuss it with you on the 19th.

Sincerely yours,

Glenn E. Ullyot
Associate Director of
Research and Development
