3 February 1959

National Institute of Mental Health
Addiction Research Center
U.S. Public Health Service Hospital
Lexington, Kentucky

I am enclosing two copies of project description -- The Addiction Liability of Synthetic Substitutes for Codeine -- which requests renewal of our contract for fiscal year 1960, beginning 1 July 1959. The amount of money requested is approximately the same as that allowed during the current year.

As you know I am trying to get NIMH to pick up part of the tab for personal services in this project. If they are successful we can refund whatever part of the money they might obtain. But since we have no way of telling what success we will have with the Bureau of the Budget I am asking them to go ahead and send this renewal through.

I hope soon to give you a full report on Psilocybin.

With kindest personal regards,

Yours very sincerely,

Harris Isbell
