Dr. Harris Isbell, M.D., Director
Addiction Research Center
National Institutes of Mental Health
U.S. Public Health Service Hospital
Box 2000
Lexington, Kentucky

Dear Dr. Isbell:

I have finally been able to get a copy of a paper reporting the first work on the barbiturate inhibitor which I sent you some weeks ago. I hope that this will provide sufficient information so that you can proceed with some experimental work. As I get more information, I will pass it on. The particular compound that you have is the plain 1, 4 endoxy-hexahydrophthalmide and is of the same batch that was used in the reported experiments.

I hope that I will get a chance to visit you in the near future.

Sincerely yours,

Enclosure:
Copy of paper on
barbiturate inhibitor
