NATIONAL INSTITUTES OF HEALTH

10 April 1957

IN REPLYING ADDRESS THE
NATIONAL INSTITUTE OF MENTAL HEALTH
ADDICTION RESEARCH CENTER
U.S. PUBLIC HEALTH SERVICE HOSPITAL
P. O. BOX 2000
LEXINGTON KENTUCKY

9c

(b)(3)

I will be attending a meeting of the Federation of Societies for Experimental Biology and Medicine in Chicago, on April 15-19th and I hope to see you there. In checking the program I note a number of papers which are of some interest to us.

I am enclosing copies of the following reports which I think will interest you:

1. Effects of Acute Administration of BAS in Man,
2. Attempted Blocking of the LSD Reaction with BAS,
3. Acute Effects of Large Doses of BOL in Man,
4. Attempts to Block LSD with BOL Given Simumtaneously with LSD,
5. Attempts to Block the LSD Reaction by Pretreatment with BOL for Two Days.

You will notice that the results of the last experiment were disappointing, probably because of the small number of subjects, and because 4 of the 8 subjects did not have significant mental reactions to the doses of LSD used.

In the near future I hope to repeat the experiments with BOL, and also to test the effects of BOL given 2-4 hours before LSD. I also hope to study blocking of the LSD-effect in man with Dibenzaline.

When the results are available I will drop you a line.

With kindest personal regards,

Yours very sincerely,

Harris Isbell, M.D.
Director
