30 April 1953

Application to Office of Naval Research for Additional Funds to Continue "Dromoran" Project During Fiscal Year 1954

I am enclosing five copies of a project entitled "Addiction Liabilities of Synthetic Analgesics That Might Serve as Substitutes for Codeine" for immediate transmission to Dr. F. H. Gulmby, Head of the Physiology Branch, Office of Naval Research. You will recall that this matter was discussed during our telephone conversation on April 29, 1953.

I have been advised by a consultant for the Department of Defense that the Office of Naval Research has money available and is very interested in continuing this project, and that the money can be made available very rapidly once the project has been submitted to the Office of Naval Research.

I have also been advised in a separate telephone conversation on April 30, 1953, that the Office of Naval Research must obligate these funds by May 15, 1953, so the utmost speed is necessary.

Please keep me advised concerning the progress of negotiations with the Office of Naval Research.

Harris Isbell, M.D.
