14 September 1970

Dear

Official action on the contract should be completed within the next week. This will be followed by contract negotiation with your organization which can be accomplished within a few days.

The clearance on is almost complete, and he should be available for work by the time the administrative matters have been settled. However, there are some details regarding his association with the project that I would like to discuss with you.

Under separate cover I am forwarding various technical reports and miscellaneous material I have accumulated in the general area of non-lethal incapacitation. It is not organized in any particular fashion but does provide some of the background information in the area. Perhaps it would be best for you to screen the publications prior to making it available to I would like the material returned when it has served its purpose. The literature dealing with electric shock is rather sparce. I borrowed a copy of the "Proceedings of the International Symposium on Electrical Accidents" which I must return. However, I have enclosed the reference information for your librarian. If you are not able to obtain a copy, let me know.

As you suggested during our last meeting, as soon as the administrative matters are completed I will visit with you and your staff to establish an experimental program which is realistic in terms of the breadth of subject matter and contractual restraints.

Sincerely,

(192)
