October 10, 1966

Dear

I have received your letter concerning the sources and wish hereby to thank you very much. The information you supplied seems entirely adequate for our needs both now and in the future. Of particular interest are your suggestions concerning the possibility of obtaining some of these animals I will proceed to shake this down and see what can be done about it if anything.

You seem to have covered this topic so well that, at this point in time, I cannot think of anything else I could possibly ask you to do. It seems to me that you have put the monkey squarely on my back to take action and I will proceed to do so. I am taking the liberty of sending a copy of your letter

I hope that things continue to move along smoothly with the range element, and shall be looking forward with great anticipation to a field demonstration. I discussed this with when he last visited here. I think we have a workable field testing plan worked out.

"All Pet's Magazine". I, unfortunately, do not have a copy of either the magazine or the article assures me it came out within the last two or three months.

Best regards to all.
