1. Forwarded herewith is the psychiatrist's report on the examination of J [redacted]. It will be seen in paragraph 4 of the attachment that we are dealing with a person whose suicidal tendency may come to the fore again at any time. We are therefore cancelling the long-range plan J we had for an [redacted] operation and intend to fill him with garbage F/I and send him back into [redacted] the way he came out. The psychiatrist feels strongly that there is little doubt that [redacted] has told the J F truth to the [redacted] interrogator about his [redacted] mission. However, as will be noted in paragraph 5 of the attachment, he is equally likely to tell F/I the truth to his [redacted] interrogator, and for this reason we cannot expect to go beyond handing the [redacted] a long interrogation job and some notional leads which they will feel bound to follow up.

2. It is requested that a copy of the attachment be given to [redacted] A and a copy to the [redacted] medical department. J
