Subject: SI and H Experimentations, 6 November 1951

On Tuesday, 6 November 1951, SI and H experiments were carried on in Building 13, Room 20, with M[redacted] and [redacted] present. In addition to Messrs [redacted] and [redacted] (medical officer assigned for proposed Bluebird trip t[redacted] in immediate future) was also present.

F

A

During the preceding week, Messrs. [redacted] and [redacted] and the writer had decided, on the basis of the excellent results obtained on the films, to proceed with the making of a training film which would cover the basic techniques of hypnotism and briefly show what could be done with good subjects operating under full SI control.

Accordingly, the entire evening was a discussion as to what type of film would be made, how it was to be made, and what material and experiments would be covered. In this connection, an outline was made and a "script" was drawn up for the training film.

At the request of [redacted] who was present for the first time and who had not previously witnessed hypnotic work, several brief hypnotic experiments and post hypnotic experiments were run off.
