Subject: SI Testing, 19 July 1951 (Polygraph Room #3).

On 19 July 1951, between 7:00 and 9:30 PM, [redacted] and [redacted] conducted SI and H experiments and tests with the following subjects [redacted], and [redacted]

As stated previously, [redacted] in [redacted] absence had continued the SI and H tests with the above subjects [redacted] had shown remarkable powers in this work while [redacted]'s work was only fair. [redacted] had been continuously a very poor subject, although very willing and interested.

A

The tests this evening continued to reflect the capacities of the subjects as set out above-[redacted] was poor, [redacted] was unable to obtain any degree of H, but [redacted] was excellent. Hence, the following report will be concerned only with [redacted] and no further comments will be made on [redacted] or [redacted]

[redacted] was first tested as to normal speech and movement. [redacted]'s conversation and movements were to all intents and purposes normal. She was capable of maintaining an intelligent conversation--appear perfectly wide awake and yet was at all times in a deep trance state.

In addition, [redacted] converted [redacted] from a wide awake state to a deep trance state by the process of merely snapping his fingers and maintaining at all times a normal look and without closing her eyes.
