Subject; SI and H Experimentation, 5 May 1953

On 5 May 1953, Tuesday, SI and H Experimentation and research was conducted by [redacted] and [redacted] in Room 20, Building 13 with [redacted] and [redacted] subjects.

A

Since both subjects were still in the process of elementary work the entire session was confined to simple induction with some tests of amnesia and PH tried. In addition, these subjects were tested under H with eyes open and some brief movements included.

Test were generally successful with [redacted] apparently showing signs of becoming an exceptional subject shile [redacted] activities seem about average.
