Subject: SI and H Experimentation, 23 June 1953

On 23 June 1953, [redacted] and the writer conducted SI and H experimentation and research with M[redacted] and [redacted]

In view of the fact that none of the subjects had shown to date any outstanding ability, routine H experimentation and P-H experimentation was carried out by Mess[redacted]

A

The response of all except [redacted] appeared normal and reasonably good, but [redacted] again illustrated that she was at all times combating the H suggestions and was totally rationalizing her actions irregardless of the type.

Nothing of any outstanding value was obtained during this session. It should be noted that [redacted] was sick at the time and [redacted] was on leave.

[redacted]
