Subject: SI and H Experimentation, 16 September 1953

On 16 September 1953, SI and H Experimentation was carried on in Building 13, Room 20, with [redacted] as subjects of [redacted] and [redacted] and [redacted].

After a general discussion conducted by [redacted] experimented with [redacted] on the "hand levitation" test which was successful and she went into a trance by continued suggestion. Then anesthesia and sensitivity of each arm was tried. A PH was given that she would sleep upon signal. This was also successful although later she said she remembered what the signal was and she could have resisted if she had desired.

A

Next [redacted] took [redacted] and had her talk, open her eyes, walk around the room and then she talked to [redacted]. She was then seated and awakened. [redacted] took the three subjects and put them into a hypnotic trance with [redacted] being lighter than the rest.
