Subject: SI and H Experimentation, 30 September 1953

On 30 September 1953, SI and H experimentation was carried on by [redacted] and [redacted] and Messrs. [redacted] and [redacted] using Misses [redacted] and [redacted] as subjects.

Since [redacted] had not seen the H film, this was shown again at the start of the session. Since there were only two subjects, [redacted] decided he would not stay.

A

[redacted] then induced a trance in [redacted] and leaving her in this state proceeded to induce a trance in [redacted] was in a sitting position and [redacted] was in a prone position. [redacted] was then left and a deeper trance was obtained with [redacted] and the somnambulistic stage was obtained. [redacted] was able to walk, talk and move about the quarters. She was then awakened and further work was done with [redacted] A trance was induced and several sensory tests were successful. A deep trance was not achieved but nevertheless more progress was noted than heretofore.

[redacted] then took [redacted] and after discussion and preliminary suggestion he quickly induced a deep trance by the method of fascination using his cigarette lighter. The subject remarked she "didn't know what hit her", she went under so quickly. She was reassured and awakened. [redacted] then talked with [redacted] to determine her reactions for future use.
