MEMORANDUM TO THE FILES

RE: SI and H Experimentation, 19 January 1954

On 19 January 1954, SI and H Experimentation and research was carried on in Building 13, Room 2Q by Messrs. [redacted] and [redacted] using the following subjects: [redacted] and Misses [redacted]

A

Only routine slow induction techniques were tried during the evening and an intensive effort was made to obtain as great a depth as possible from all individuals present. In this it would appear that the efforts were extremely successful since all present obtained greater depth than they had previously been able to reach.

Three separate inductions were run and a few simple Fhs, and Tests were made. The main effort was concentrated on obtaining a greater depth.
