Subject: SI and H experimentation, 10 March 1954

On 10 March 1954, Wednesday, SI and H experimentation and research was carried on in Building 13 by Messrs. [redacted] and [redacted] and using the following subjects: Misses [redacted], a new volunteer.

A

In view of the fact that there were a considerable number present and [redacted] had not yet attained considerable depth and [redacted] was new, the session was devoted to routine induction and simple tests and PH.

The writer gave [redacted] the standard security briefing and tested [redacted] on the falling back and hand-raising test. She responded somewhat better than usual. As mentioned above, all other tests were routine and nothing unusual was accomplished.
