Subject: SI and H Experimentation, 16 February 1954.

On 16 February 1954, Tuesday, SI and H experimentation and research was carried out by Messrs. [redacted] and [redacted] and using the following subjects: [redacted] and [redacted]

A

This session was very unsuccessful probably due to the fact the night was extremely warm and the air conditioning equipment in the operations room was not working so that the area was uncomfortable and very close. Several routine inductions were run but when special work was attempted, results were not good. In fact, during one of the tests [redacted] became somewhat ill and the test had to be broken off prior to completion.

In view of the complaints of heat and poor air conditions this session was concluded at approximately 8:15 AM.

No special work was attempted with [redacted] At present, her ability cannot be definitely determined.

[redacted]
